Woven baskets from Ondene. For stockists see Address Book.

Comfort zone

A mix of dark glossy finishes and polished surfaces brews a rich blend in this living space.

DESIGNERS MERYL HARE AND VICTORIA CYBULSKI: "The brief was to create a comfortable yet sophisticated kitchen and to open up the existing space to the living/dining room. The tones of the finishes palette seamlessly carry through from the living spaces and cohesion is achieved with a similar design language throughout. A reflective splashback captures light from the northern window and extends it into the space. We mixed benchtop and island bench thicknesses and materials for texture and detail variation to enhance the rich palette." *What luxury item did you choose for this kitchen regardless of budget?* "The concrete island bench, we had to pull off the window and crane it in to this third-floor apartment."
